Joann:

This estimate is based upon situation on 5/8/15. I modified the estimate based upon when we expect to be demobed which will be around June 12. The estimate went to just under \$ 200K. I am still ok with \$ 150K. Not sure if we want to give them this much or hold back so they don't try to spend it all during closeout. We need to keep the pressure on them. I still think the closeout costs are very high but considering their procurement process and procedures maybe so.

Thanks
